Supply and Demand

In the last few weeks the market has achieved a relative stasis point in terms of sales to inventory. However, inventory is sufficiently low to keep us in the Seller's Market zone so watch changes in the MAI. If the market heats up, prices are likely to resume an upward climb.

Price

We continue to see prices in this zip code bounce around this plateau. Look for a persistent down-shift in the Market Action Index before we see prices deviate from these levels.

The Market Action Index answers the question "How's the Market?" by measuring the current rate of sale versus the amount of the inventory. Index above 30 implies Seller's Market conditions. Below 30, conditions favor the buyer.
